

BSC Weather Policy

It is our policy to hold games and practices whenever it is safely possible to do so. Rain alone will not lead to cancellation of activities. For the safety of the players and spectators, activities will be cancelled or postponed for the following weather-related reasons:

- *Lightning/Thunder*: In the event of lightning/thunder within a 10 mile radius* of Keas soccer complex, all activities will be halted immediately. Activities will not resume until at least 30 minutes after the last incidence of lightning or thunder.
- *Other Dangerous Weather Conditions*: In the event there are weather conditions, such as hail, that may present a danger to players and spectators, all activities will be cancelled or postponed while the dangerous weather conditions are present.
- *Dangerous Field Conditions*: If the fields are in a condition that presents a dangerous playing environment for players or where play may cause significant damage to the fields themselves, events will be cancelled or postponed for that day. This may occur on days of nice weather if precipitation has occurred on prior days. Always check the field status hotlines before showing up for practice or games if it has rained in the past couple days.

918-366-6456

- The decision to cancel activities based on severe weather or field conditions is made by the BSC Board President or BSC Area Referee depending on the situation.

*10 mile radius will be set by the BSC Weather Alert system located in the Concession Stand at Keas soccer complex.
